e-Planning Agenda

e-planning knowledge infrastructure	mapping the Portuguese knowledge society / mapping the planning knowledge.
e-planning for the government of the future (e-government)	more efficient and responsive, closer to citizens, better enabling role, better e-government
e-planning for a new governance (e-governance)	better services towards the common good, better institutions, better regulations for a truer market and handling market failures, better balance security vs. freedom, more equity-less exclusion.
e-planning for the city of the future (e-city)	better quality of life, new functionality, breed innovation, more attractive and competitive
e-planning for a new citizenship (e-citizenship)	enabling a better informed and educated citizen, more participative, more critical, more responsible

Transversal Topics:

International Cooperation on e-Planning

Curricula Modernization on e-Planning

FROM **MIT-Portugal** FORMAL FINAL REPORT (Prof. Dan Roos to Portuguese Government)):

> *"Although we have received suggestions about many potential projects and focus areas, we mention "**e-Planning**" initiatives in particular because we have received many expressions of interest from faculty in Portugal and MIT.*
>
> *We suggest that the "**e-Planning**" initiatives should be the subject of further analysis during the coming year after the launching of the initial program"* (page 5)
